

Profile

Hardworking, ambitious, fast to change, inner motivation, self-learning, creative, positive mind, and flexibility are the keywords that define me better.

Honestly, I am not that type of guy who sit and think that what he knows is enough, I am eager to learn new things or be in new place because it helps me to realize that I still have many things to learn. I believe in self-learning as you can't be taught all necessary skills that can make you competent.

Experience

Full-Stack Developer

Activision | San Francisco, CA | 2016
