 - Competition
- Application page for the competition
- Blogging – no poems included (only knowledge about poetry)
- About Us page
- Contact Us page
- Team (Transportable & Partners)
- Donate – donation
- Sign up & Sign in (Only for poets who wish to share their poems to the world)

Additional Features:

- Newsletter subscription
- Commenting and liking poems
- (Self stocking of others)

Explanation:

poems on the platform. Unless the poem is being posted by an admin (Transpoenta poets), otherwise, it will need an approval from an admin. In the meantime, it will not be visible publicly. The user will have the ability to save upto 5 poem drafts (to minimize the cost of database/storage) on his account. There will be liking and commenting options.

Updates: the updates will be in three categories (Workshops, events, competitions), and there will be an index page which shows all updates. However, the user will have an opportunity to filter and see only posts from a certain category.

Competition application page: (Self-explanatory feature)

Bloggng: This is a feature for Transpoenta writers for them to share the knowledge about poetry. (N/A to poems on this page)

About us page: this page will share the mission, vision and objectives of Transpoenta.

Contact us page: this page will share the contact and location of Transpoenta. In addition, it will allow the reader to leave a message or to Transpoenta by filling the contact us form.

Team page: This page will introduce the reader to any member of Transpoenta family (Name, role and Short biography). In addition, it will also provide a clue of who is the partner of Transpoenta (company name and what it does).

Donate page: This feature is will allow an individual who wants to give a financial donation Transpoenta to do so immediately. - (But the team has feared this feature to be risky when it coming to hacking. What is good for Transpoenta is to allow the user to provide his info so that Transpoenta can contact him/her or the user can directly to the org which is specialized

Sections (Sign up/Sign in/Logout) This feature will allow the poets to create and manage their accounts. The poets will have the opportunity to post their poems on the platform.

Clarification:

- The team thought of allowing the poets with an account to give poems drafts. We were wondering if we can allow the administrators (Trang Nguyen) to see what is going in their private account.
- Making donation was easy when it comes to hacking since you share the bank info. We have provided options above, what do you think?
- Do you want to advertise other companies' products?
- How do you want to receive competition application info? (is there any statistical information statistics you need to receive?)
